

# Soulful Rock

Founded in June 2019, Pilots of the Daydreams offer a powerful and expressive sound. The band's musical cosmos is a sonic hybrid of modern, heavy and progressive rock elements with spherical, energetic arrangements with distinctive and varied vocals. According to their own statement, the music is not fast food, but "handmade" with a long-term effect for rock enthusiasts - organic, unpolished and authentic - that's how rock 'n' roll should sound!

The band's credo is: "There are many reasons to get your heart pumping - rock music is one of them. Pilots of the Daydreams are three experienced musicians from Eastern Switzerland who reveal earthy and powerful rock music to the audience - a soul trip for the rocker's heart".

# Press reviews of the album

## SCHALL.

At times there are guitar parts reminiscent of U2. Marco Predicatori's voice is wonderfully interspersed with a rough tone, which especially builds up the songs "Closer To The Sky" and "Lost Brotherhood" into veritable hits of the album.

## PASSION ROCK

This band really offers an album with a strong personality, where we have the feeling that the musicians have really decided to enjoy themselves without any particular constraint, and that is what makes this work so appealing.

## Radio Munot

Once again, good rock music from Switzerland that is worth buying!

What I hear is well-played rock that reminds me of Muse in songs like "Picture Of My Sins". There are musical parallels to bands like R.E.M and U2.
